Summary

Backend Developer with 3.10 years of experience building high-performance APIs using Node.js, Express.js, MongoDB, and PostgreSQL. Designed and optimized systems handling high-volume requests, improving API response time and reliability. Built and scaled ERP and payment systems with secure authentication (JWT) and real-world production deployments.

Skills

- Languages: Node.js, JavaScript, TypeScript, PostgreSQL, MongoDB, Java.
- Frameworks & Libraries: Express.js, Sequelize, Mongoose, JWT, REST API, API Gateway, Angular, Supertest.
- Tools & Platforms: GitHub, Linux, Postman, Jira, Docker, CI/CD.
- Integrations: Payment Gateway, Firebase Cloud Messaging (FCM), Webhooks.

Education

Marwari College Ranchi, Jharkhand	Aug 2020 – Jun 2022
Master of Computer Applications (MCA)	Percentage: 84.81 %
Marwari College Ranchi, Jharkhand	Aug 2017 – Jun 2020
Bachelor of Science in Information Technology (B.Sc. - IT)	Percentage: 73.94 %

Experience

Software Engineer , Vivid Innovations Pvt. Ltd., Bangalore Backend	July 2022 – Present
• Developed REST APIs for ERP modules (student, fees, reporting) serving 5k+ users with concurrent access. • Reduced API response time by 40% through query optimization and indexing in PostgreSQL. • Integrated Easebuzz payment gateway handling Rs. 10L+ monthly transactions with idempotent webhook design. • Improved system reliability by implementing error handling and retry mechanisms for critical workflows.	

Projects

Gruppie Campus Connection , Backend Developer	Feb 2024 – Present
• Built ERP system supporting 5k+ students across enrollment, payroll, and attendance modules. • Implemented idempotent payment webhooks preventing duplicate transactions in high-concurrency scenarios. • Optimized database queries reducing average response time from 1s to <300ms.	
Veerashaiva Mahasabha Community , Backend Developer	April 2023 – Jan 2024
• Built backend systems for member management, book inventory tracking, and election workflows. • Developed secure APIs with location-based filtering and real-time inventory updates for improved data accuracy.	
GST Data Comparison System , Backend Developer	July 2022 – Mar 2023
• Developed APIs to compare GST 2B data with purchase registers for automated tax reconciliation. • Built mismatch detection and real-time syncing to improve financial data accuracy.	

Certifications

- Completed Backend API Development certification from PW, focused on REST APIs & JWT auth.
- Completed Git & GitHub Bootcamp certification from Let's Upgrade, covering version control and collaboration.
